Resilient Northeastern NJ – Vision and Priorities Questions

The Resilient New Jersey project aims to develop flood risk and resilience solutions for the Northeastern New Jersey region, which includes Jersey City, Newark, Hoboken, and Bayonne. The project is funded and spearheaded by NJDEP, and is led by the municipalities, Hudson County, as well as two community-based organizations (HOPES CAP and Ironbound Community Corporation). Learn more at www.resilient.nj.gov/nenj.

Please share what you value about your community and your vision for your community's future, or any other thoughts you may have that could help guide the project. We will use this feedback to guide development of an action plan to address flood risks. We will summarize and share feedback to the public while protecting anonymity. Thank you for taking the time to share with us! Your input is critical to ensuring the project meets the core needs of those who could be affected by it.

1. Please provide your zip code: _____

2. How has flooding affected your life or community?

3. What are your biggest concerns about flooding?

4. What community facilities have you or your family used most? For example, specific parks, hospitals, food banks, non-profit organizations, etc. The project will evaluate how flooding will affect these places in future years.

5. What do you value most about your community?

6. What changes in your community do you want to see for yourself and for future generations?

7. What should be the primary deciding factor when choosing between several possible actions that could reduce flood risk in your community?

8. Is there anything else you would like us to know?
